

Installation and Network Instructions - Mac

1.

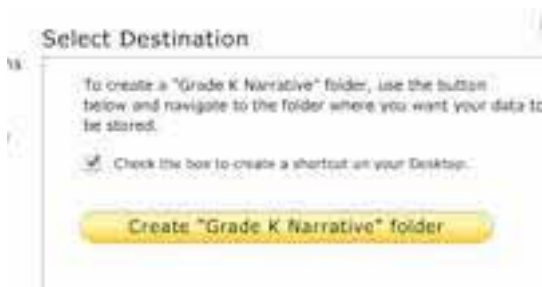

mac_install

2.

Network License

3.

4.

Installation

1. Double-click on the 'mac_install' file for Macintosh (in the **installer** folder for Grade k, 1 and 2).
2. Select 'Network License.'
- Press 'Continue.'
3. Select the 'Create ... folder.'
(In this case, the 'Create "Grade K Narrative" folder')
You will be prompted to choose a place on your computer where you want the folder and data to be stored.
4. Install onto the server.
(In this case, into a shared folder called AWARD)

1.

2.

Networking

1. Once installed, go to each computer on the network and browse to the folder on the server where the program is installed.
(In this case, the folder is called AWARD)
2. Copy or drag the alias (shortcut) that has been created onto each desktop. This must be done for every computer on the network.

The program is now networked.

Note:

If the server is using a shared folder to network from, you must copy the shortcut or aliases from within the folders that have been installed, not from the shortcut or aliases that are automatically generated on the desktop.
